PROFILE

Full-Stack PHP developer with over 10 years of experience designing, developing and maintaining robust web applications. Expert in relational (MySQL, PostgreSQL) and non-relational (MongoDB) databases. Strong knowledge of PHP frameworks (Laravel, Symfony) and Docker containers for scalable development and production environments.

WORK EXPERIENCE

Mytheresa
Warehouse Operative | Leipzig, Germany | 04/2024 - 10/2024
At Amazon, I performed operational functions within the Warehousing area, contributing to the efficient management of inventory and logistics.
Tech Stacks:

Amazon Fullfilm
Warehouse Operative | Leipzig, Germany | 09/2023 - 03/2024
At Amazon, I performed operational functions within the Warehousing area, contributing to the efficient management of inventory and logistics.
Reception and classification of merchandise: Verified the reception of products, controlling their quality and condition, and classified them according to their destination within the warehouse.
Order preparation: Selected and packaged products accurately and efficiently, following system instructions and meeting delivery deadlines.
Machinery Operation: Safely and responsibly operated different types of machinery, such as forklifts, PUPs and trucks, to load and unload products.
Inventory maintenance: Updated inventory in real time, recording product entries and exits, and verified their location within the warehouse.
Tech Stacks:

Roberto Verino diffusion
FULL STACK DEVELOPER | Ourense, Spain | 03/2021 - 07/2023
At Roberto Verino I worked as a full stack developer, where I participated in the development of web applications for the e-commerce platform. I implemented shopping cart, order management and payment functionalities, using languages such as PHP and C#.
To optimize the development process, I used Linux development environments and Docker containers, which allowed me to automate the delivery system for products to customers. This resulted in an 80% reduction in delivery and tracking time.
I worked under the agile methodology and used the MVC scheme to structure the applications. In addition, I implemented a version control system with GIT to ensure collaboration and change tracking.

Tech Stacks: **PHP 8, C#, Linux, Docker, Ansible, Mysql, MSSQL, GIT**

Origami solutions IT Services
Developer | Ourense, Spain | 01/2021 - 03/2021
As a developer at this company, I gained skills in app development, WordPress installation and configuration, and Moodle integrations.
Tech Stacks: **PHP, Linux, Docker, Mysql, Android, GIT**

Nexus 8 - Trade-Distribution
Developer | Ourense, Spain | 08/2020 - 12/2020
The project focused on creating various modules for Nemeton Distribution's Marketplace platform, expanding its functionalities and improving the user experience.
The modules were developed using state-of-the-art technologies, allowing for seamless integration with the existing platform. Item Import, Allowed users to import items into the Marketplace platform from different sources such as CSV or XML files, streamlining the product upload process.
Tech Stacks: **PHP, Linux, Mysql, MSSQL, GIT**

RE.NA.TRE - National Registry of Rural Workers and Employers
Developer | Buenos Aires, Argentina | 06/2004 - 03/2019
I participated in the development of the institutional portal and the online self-management system for workers and employees, which allowed users to manage their labor relations, consult their contributions, record contribution periods and assign unemployment benefits.
I also participated in the development and maintenance of modules for the Intranet system in PHP language, such as unemployment benefits and rural work booklet. In addition, I was in charge of the administration of PostgreSQL databases with a large volume of data, crossing data in real time through API, with governments and public bodies.
I was given the task of modernizing and updating the rural worker's booklet from paper format to electronic card format and online support, which allowed for reduced costs and operating times. The system allowed more than 900,000 users to manage their labor relations.
Leading the development department with nine developers under my supervision.
Tech Stacks: **PHP, Linux, Docker, Ansible, Postgresql, Mysql**

METROGAS
LAN Network Administrator | Buenos Aires, Argentina | 03/2003 - 05/2004
Novell Network Manager 4/5, NT/W2K Server Check
Creating users, groups, permissions management.
NDS maintenance, file system backup, application creation.
Tech Stacks: **Novell, Windows, Arcserve, Managewise**

TELECOM
LAN Network Administrator | Buenos Aires, Argentina | 10/1999 - 02/2003
Novell Network Manager 4/5, NT/W2K Server Check
Creating users, groups, permissions management.
NDS maintenance, file system backup, application creation
Antivirus check, registry check, group mail maintenance, Zenworks maintenance, Border Manager server check

Tech Stacks: **Novell, Windows, Arcserve, Managewise**

GATIC SAICFIA
Developer | Colonel Suarez, Buenos Aires, Argentina | 06/1984 - 09/1999
During my professional career, I have had the opportunity to work on a variety of projects and systems. In particular I would like to highlight my experience in:
Development and maintenance of salary system using RPG II in AS/400.
Maintenance of the production and operations control system, in Clipper 5
Creation of modules for the salary settlement and time control system in RPG II.
Maintenance of the footwear production system, with a daily production of 17,000 pairs of footwear and sportswear.
Maintenance of the shipping system, including the use of barcodes on products, labeling and tracking. Maintenance of the footwear warehouse system.
Design and implementation of a corporate network on Windows/Novell platforms.
In addition, I had the honor of leading the computing and systems department, managing a team of three developers and two IT support staff.
Tech Stacks: **Clipper, RPG, RPG400, AS400, S36, DB2, DOS, Novell**
