Jose A. Alvarez Weingartt, Full-Stack Developer

+34 684 702 762   **|**   Ourense, España**|** joalweingartt@gmail.com

PROFILE

Full-stack PHP developer with more than 10 years of experience developing scalable, high-performance applications . Experience in PHP (Laravel, Symfony) , MySQL, PostgreSQL, and MongoDB databases . Systems integration skills. Strong knowledge of PHP frameworks (Laravel, Symfony) and Docker containers for scalable development and production environments.

WORK EXPERIENCE

Roberto Verino diffusion
Full-Stick Developer | Ourense, Spain | March 2021 - July 2023
Developed and optimized e-commerce applications in PHP 8 and C#, reducing loading times by 40% and increasing conversion by 30% through SQL query optimization.

Implemented RESTful APIs with Symfony, facilitating integration with external services and improving system scalability.

I automated product delivery using Docker and Linux environments , reducing processing and tracking times by 80% . I implemented design patterns such as Hexagonal Architecture to improve code scalability and maintainability and managed versions with GIT , ensuring agile integration into collaborative teams using Scrum methodologies .

Origami solutions
Developer | Ourense, Spain | 01/2021 - 03/2021
As a developer at this company, I gained skills in application development, WordPress installation and configuration, and Moodle integrations.

Nexus 8 - Trade-Distribution
Developer | Ourense, Spain | 08/2020 - 12/2020
The project focused on creating various modules for Nemeton Distribution's Marketplace platform, expanding its functionality and improving the user experience.
The modules were developed using cutting-edge technologies, allowing for seamless integration with the existing platform. Item Import, allowing users to import items into the Marketplace platform from different sources, such as CSV or XML files, streamlining the product upload process.

RE.NA.TRE - National Registry of Rural Workers and Employers
Developer | Buenos Aires, Argentina | 06/2004 - 03/2019
I participated in the development of the institutional portal and the online self-management system for workers and employees, which allowed users to manage their employment relationships, check their contributions, record contribution periods, and assign unemployment benefits.

I also participated in the development and maintenance of modules for the Intranet system in PHP, such as unemployment benefits and the rural work book. I was also in charge of managing PostgreSQL databases with large volumes of data, cross-referencing data in real time via APIs with governments and public agencies.

I led the digital transformation of the rural worker's booklet, benefiting more than 900,000 users and reducing operating costs by 70 % .

I led a team of 9 developers , managing the development of solutions that improved administrative efficiency by 40 % . I collaborated with technical and non-technical teams to improve digital processes.

METROGAS
LAN Administrator | Buenos Aires, Argentina | 03/2003 - 05/2004
Novell Network Manager 4/5, NT/W2k Server Testing
Creating users, groups, and managing permissions.
NDS maintenance, file system backup, application creation.

TELECOM
LAN Administrator | Buenos Aires, Argentina | 10/1999 - 02/2003
Novell Network Manager 4/5, NT/W2k Server Testing
Creating users, groups, and managing permissions.
NDS maintenance, file system backup, application creation
Antivirus check, registry check, group mail maintenance, Zenworks maintenance, Border Manager server check

GATIC SAICFIA
Developer | Coronel Suarez, Buenos Aires, Argentina | 06/1984 - 09/1999
Throughout my professional career, I've had the opportunity to work on a variety of projects and systems. In particular, I'd like to highlight my experience in:
Development and maintenance of the salary system using RPG II on AS/400.
Maintenance of the production and operations control system in Clipper 5
Creation of modules for the payroll and timekeeping system in RPG II.
Maintenance of the footwear production system
Maintained the shipping system, including the use of barcodes on products, labeling, and tracking.
Maintained the footwear warehouse system.
Design and implementation of a corporate network on Windows/Novell platforms.
Additionally, I had the honor of leading the computing and systems department, managing a team of three developers and two IT support staff.
